Collagen – The Body Protein!

Collagen is a major component of the human body. About 30 % of our total body protein is collagen. Collagen is crucial for mobile joints, stable bones, healthy muscles, strong ligaments and tendons, smooth skin, glossy hair and healthy nails. It is one of the primary structural proteins of connective tissues and also abundant in blood vessels, intervertebral discs, the blood-brain barrier, the cornea, dentin and the intestinal wall – a vital component of our whole body.

The effect of collagen peptides on increased extracellular matrix synthesis is based on two mechanisms:

- 1) Supply of typical collagen amino acids as valuable building blocks
- 2) Stimulate cell synthesis

FOR SIGNIFICANT IMPROVEMENT OF SKIN HEALTH

HIGHER SKIN ELASTICITY

DECREASE CELLULITE

REDUCTION OF WRINKLES

GROWTH & HEALTH OF FINGERNAILS

IMPROVED SKIN SURFACE STRUCTURE
